## The Philosophy

"I believe drama should be an integral part of a child's education. I am involved with the workings of the imagination and the craft of communication. Drama is so much more than theater, which deals with a performance and an audience. I have seen so many unsuccessful workshops in which the production is more important than the child's development. I am concerned with providing opportunities for invention and expression, with an understanding of human situation and behavior, through movement and speech; with a bringing to life - in a way that adds to personal experience. Drama cannot be separated from the arts - music, movement, speech and song, the visual arts, poetry; technical skills, history and literature, especially storytelling. Drama is vital to all life skills!"

## Aims and Objectives.

1. To stimulate the students' imagination and to extend their creative awareness.
2. To develop the skills required for efficient communication, both audible and visual.
3. To liberate pupils from self-consciousness to develop their whole personality, physically, emotionally, and intellectually.
4. To develop the students' concentration.
5. To intensify their awareness of people and things around them.
6. To impart some knowledge and appreciation of the history and the practice of drama and the theater.

To do all this in a homely atmosphere of comfort and fun.
